Art.no	Description	Max. AMP	Suggested max amount chargers per single group.
04700020	Charge unit Type J ***	10A	10
04700030	Charge unit Type G ***	13A	12
04700000	Charge unit Type F ***	16A	16
04700010	Charge unit Type E ***	16A	16

*** refer to sheet 2 for socket information

E+Charger beveiliging

Wij adviseren een eigen groep van maximaal 10A (Type J) of 16A (Type E & F) aangevuld met een eigen aardlekschakelaar (RCD), of een 10A / 16A aardlekautomaat (RCBO). De lokale regelgeving is leidend.

E+Charger protection

We recommend a dedicated group of up to 10A (Type J) or 16A (Type E & F) supplemented by a dedicated residual current device (RCD), or a 10A / 16A compact protection device which provide MCB overload protection and RCD earth leakage protection in one device (RCBO). According to local standards.

E+Charger Schutz

Wir empfehlen eine dedizierte Gruppe von bis zu 10A (Typ J) oder 16A (Typ E & F), die durch einen dedizierten Fehlerstromschutzschalter (RCD) oder einen 10A / 16A Fehlerstrom-Leitungsschutzschalter (RCBO) ergänzt wird. Gemäß den örtlichen Normen.

La protection E+Charger

Nous recommandons un circuit dédié de maximum 10A (Type J) ou 16A (Type E & F), complété par un disjoncteur différentiel (RCD) ou un disjoncteur différentiel compact (RCBO) de 10A / 16A. La réglementation locale prévaut.
